

SPACEGEN AVIATION

SpaceGen Aviation Aerospace & Defence Pvt.Ltd.

A New Era of **Rapid Response Air Mobility**

Building **India's Next Generation eVTOL Platform for Public Safety, Emergency Response & Defence**

THE CHALLENGE &
WHY EXISTING SOLUTIONS **FALL SHORT**

- Injured soldiers in remote terrain
- Disaster victims awaiting rescue
- Urban medical emergencies
- Critical supply delivery

Current solutions are often too slow.

Ground Vehicles:
- Traffic and terrain constrained

Helicopters:
- Expensive
- Complex operations
- High maintenance

Need: Compact rapid-deployment air mobility.

THE SOLUTION

SPACEGEN AVIATION

PINAKA-1

SPACEGEN AVIATION

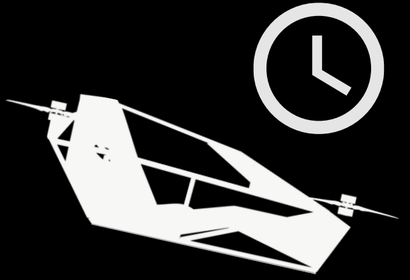

DESIGNED FOR **RAPID DEPLOYMENT**

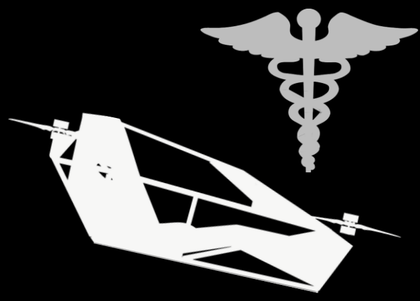

Operates from 3m × 3m area

Medical Evacuation

Quick Response time

Emergency response

SPACEGEN
AVIATION

PERFORMANCE TARGETS

- Speed: 150–220 km/h
- Endurance: Up to 2 hours
- Payload: Up to 120 kg
- Foldable transportable design

EMERGENCY RECOVERY SYSTEMS

- Ballistic parachute
- Automatic hover mode
- Autonomous safe landing
- Pilot incapacitation protection
- Hybrid battery + hydrogen backup

MULTI-LAYER SAFETY ARCHITECTURE

- 8-Motor Distributed Propulsion
- Redundant flight computers
- Redundant communications
- Redundant navigation systems
- Backup power architecture

Safety-first design philosophy with multiple layers of redundancy and emergency recovery systems.

INTELLIGENT FLIGHT SAFETY

360° LiDAR + SLAM

- Obstacle detection
- Collision avoidance
- Pilot override protection
- Autonomous flight corrections

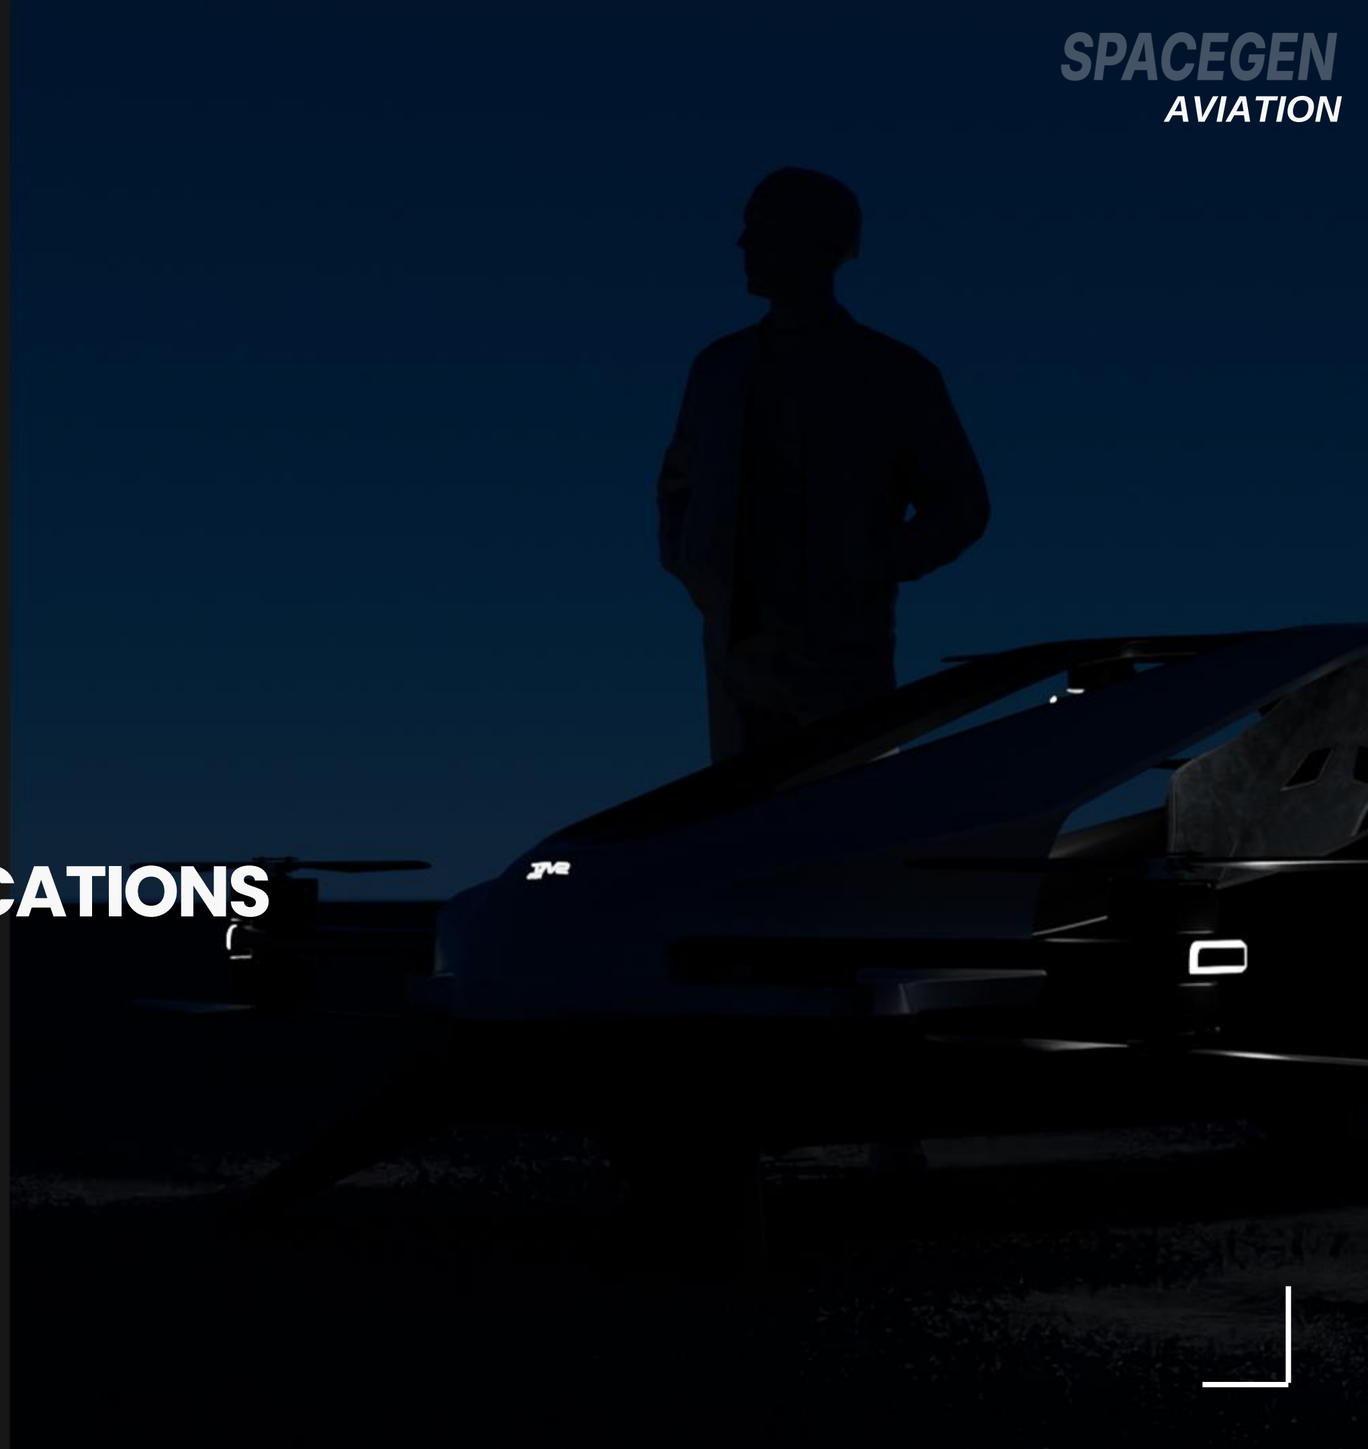

APPLICATIONS

DEFENCE APPLICATIONS

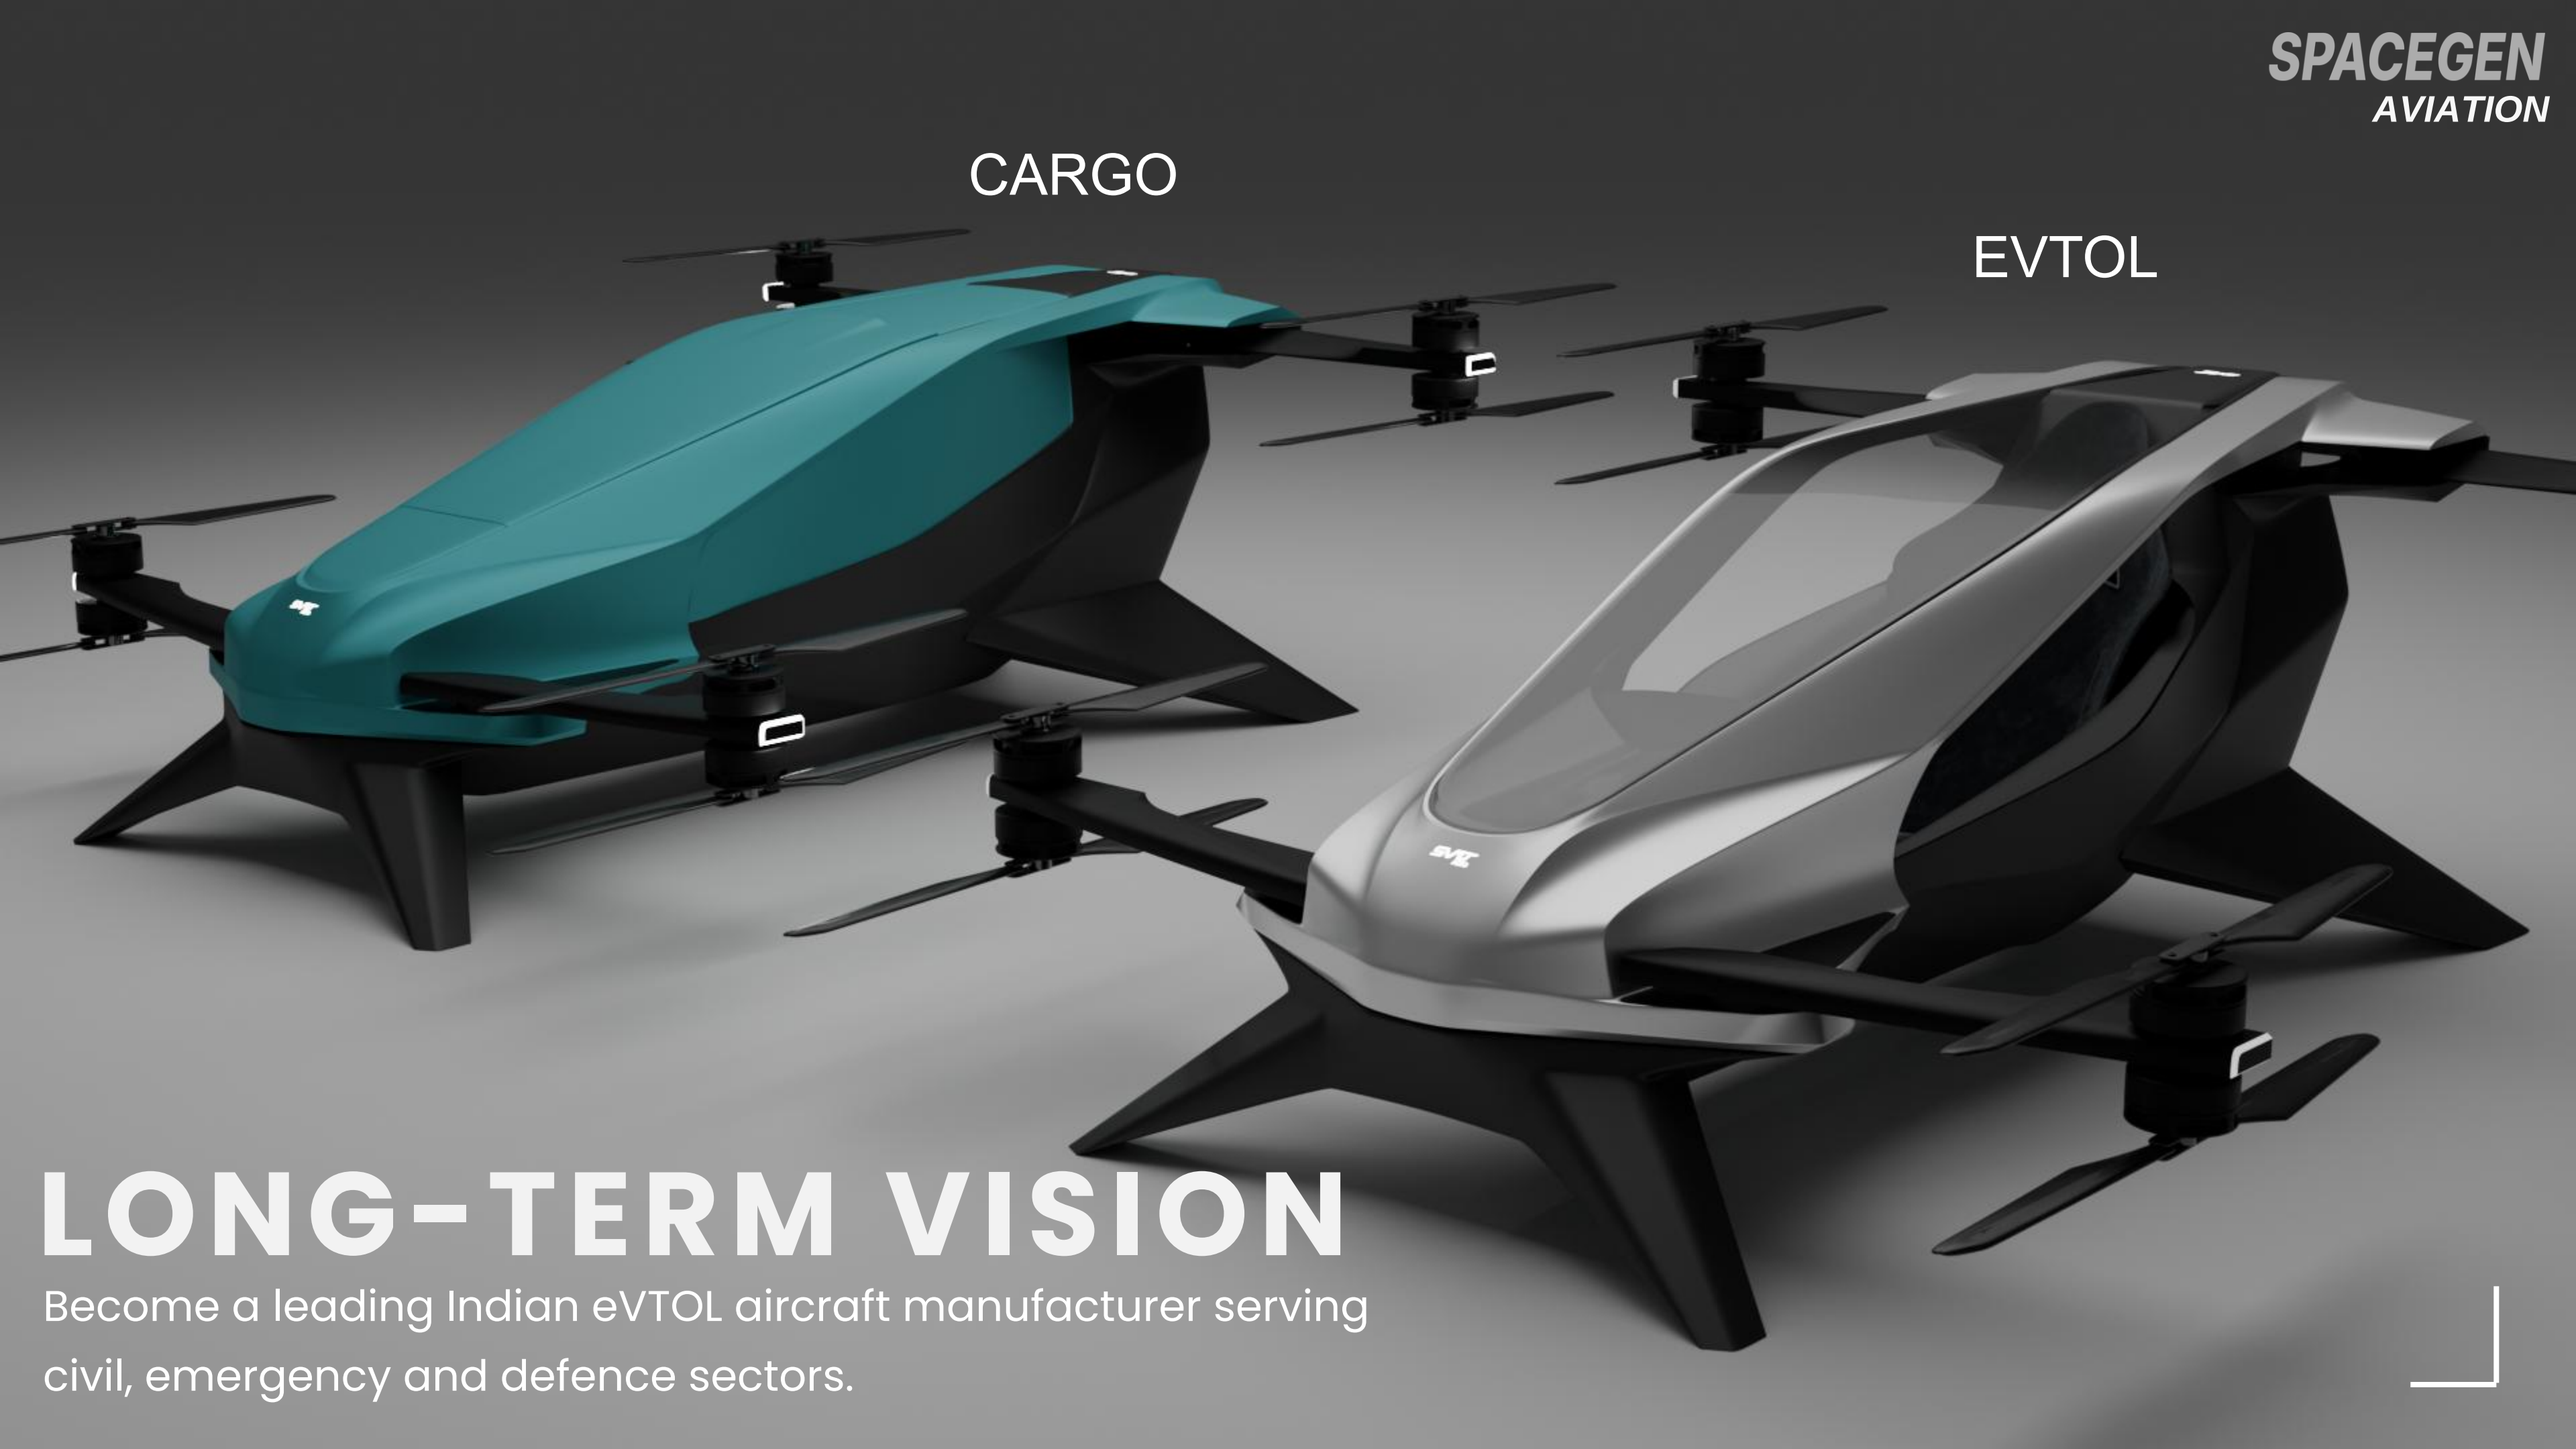

- Mountain logistics
- Border operations
- Medical evacuation
- Coaster Surveillance
- Personnel transport
- Ship to shore
- Emergency supply delivery

CIVIL AND PUBLIC SAFETY APPLICATIONS

- Emergency medical response
- Firefighting support
- Natural Disaster management
- Police operations
- Crowd management
- Search and rescue

SPACEGEN
AVIATION

LONG-TERM VISION

Become a leading Indian eVTOL aircraft manufacturer serving civil, emergency and defence sectors.

PROTOTYPE X

SPACEGEN
AVIATION

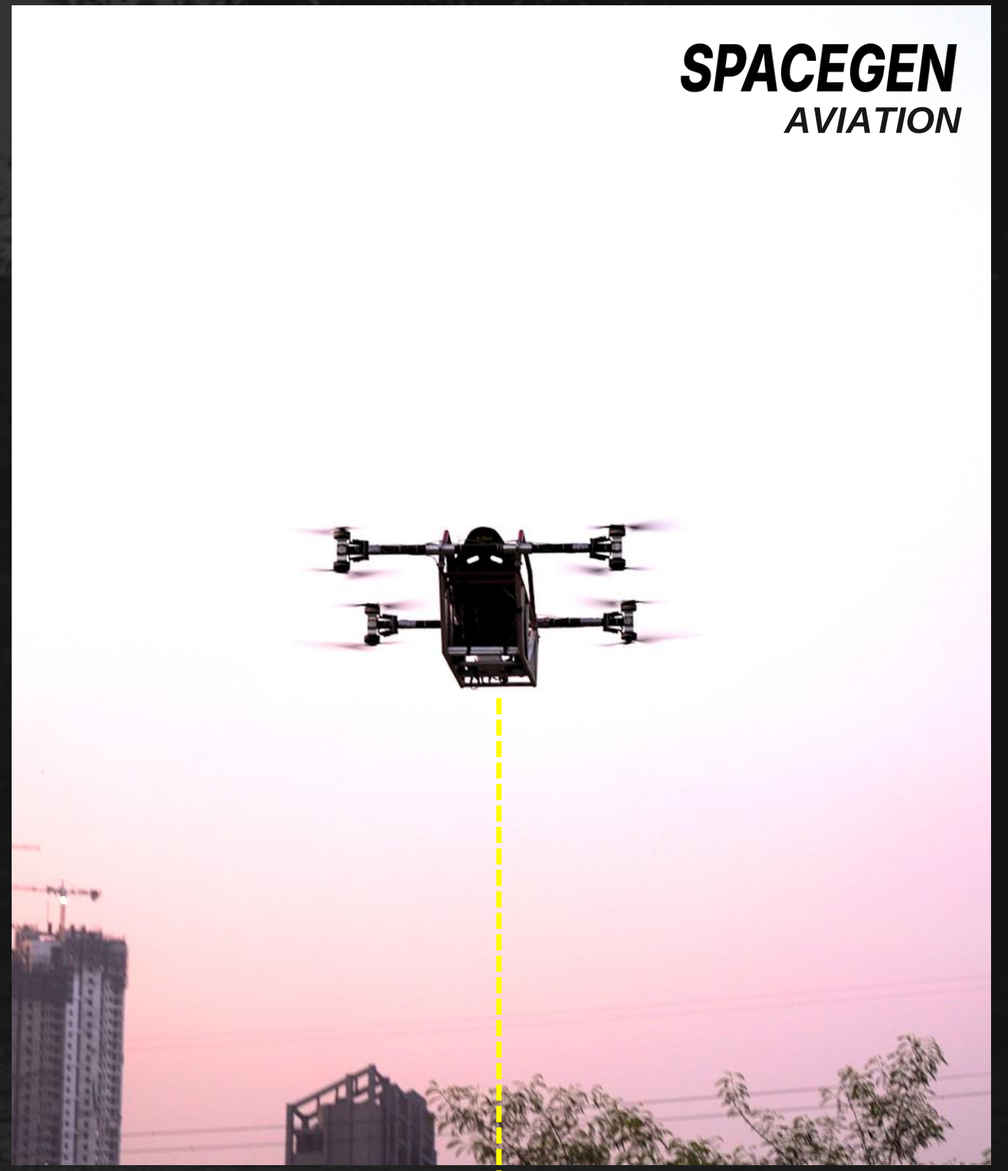

(PROTOTYPE X)

Flight test results:

Flight test results:

- Flight time : **30 mins**
- Speed : **150 Kmph**
- Human weight capacity : **~100 kg**
- Range : **50 Kms**

COMPETITORS
